consumer warranty

Kramer Guitars offers a limited warranty for all models against any factory defects for a period of one year from the date of retail purchase to the original purchaser. All shipping costs will be at customers expense.

This warranty does not cover repairs caused by normal wear, misuse, accidental damage or the natural cracking of wood or finishes that result from climatic changes.

Registration must be made within 10 days of retail purchase to assure warranty coverage. Any servicing other than that performed or authorized by Kramer voids this warranty.

Any/all guaranties and warranties (in writing or implied) are null and void if purchase is made through any party other than an authorized Kramer dealer.

Kramer Music Products, Inc., shall not be liable for any direct, special, incidental or consequential damages incurred by reason of breach of the above provisions, except as expressly provided above.

The provisions of this warranty shall be covered by the local laws of the state where the original purchaser shall purchase products covered hereby, and shall be enforceable only to the extent, and in the manner, permitted under such laws.

EXCEPT AS HEREIN EXPRESSLY PROVIDED, KRAMER MUSIC PRODUCTS, INC., MAKES NO WARRANTY, EXPRESSED OR IMPLIED, OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR OTHERWISE. KRAMER DISCLAIMS ANY LIABILITY FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES BEYOND THAT WHICH IS EXPRESSLY PROVIDED FOR IN WRITING HEREIN.

kramer kare

Congratulations on your new purchase. Your new KRAMER GUITAR has been manufactured from the finest materials available. Painstaking attention has been given to the selection and detailed final finishing of our exotic woods and precision metals.

You can maintain this "new" look and feel for some time by following this brief KRAMER KARE guide. Please note — certain items listed below apply to aluminum neck guitars only.

1. Keep the instrument clean. Your instrument performs at its best when it is clean. Dirt, wax deposits or other foreign materials that are allowed to accumulate will impede efficiency. Frequent cleaning, using a soft cloth and a good polish, is highly recommended.
2. Do not use any abrasive materials (paste, liquid or cloth) on any exposed surfaces.
3. All metal parts are custom tooled from virgin aluminum and stainless steel and with reasonable care, will maintain their rich luster for many years.
4. The fingerboard requires no maintenance whatsoever but should be wiped down after use.
5. Keep the strings clean. Deposits of foreign materials left to accumulate in the windings of the strings cause rust and loss of excursion. This results in pitch and intonation problems in the upper pitch ranges of the instrument. It is important to wipe the strings clean and bright on all surfaces after each use. Fresh strings add to the exciting tonal qualities and sustain of your KRAMER instrument. Change them often, using the string gauges similar to those provided with your instrument. Consult with your KRAMER dealer for the purchase of approved KRAMER strings and accessories.

We feel confident that these basic recommendations will help you enjoy many years of reliable performance with your KRAMER GUITAR. Write us, Attn. Service Department, at any time if you need our assistance, information or just want to comment on KRAMER products.
